

ENVIRONMENTAL COMMITMENT

At Grupo SURA we seek to promote environmentally friendly business dynamics that, with a long-term vision, respond to the needs of the ecosystem and the expectations of our stakeholders.

Our commitment

As an investment manager, we assume the responsibility of leveraging strategies, initiatives and/or projects that, consistent with an ethical posture, protect natural capital and help reduce negative impacts on the environment.

Foundations of our commitment

- Promote among the companies in our portfolio the adoption of environmentally friendly practices, compliance with environmental regulations and the adoption of the precautionary principle.
- Periodically analyze the environmental performance of our strategic investments.
- Adopt environmental criteria in the selection process of our suppliers and in the activities related to our operations.
- Consider the environmental aspects and impacts in the analysis of investment projects and business development.
- Create dissemination and knowledge scenarios that promote a culture of caring for natural resources.
- Participate in alliances aimed at research, development and use of technologies that favor the protection and care of the environment.

collective efforts

Currently, Grupo SURA participates in institutional alliances that bring together various sectors to join forces on environmental issues. Likewise, and in coherence with the [Social Investment Framework Policy](#), we promote and support the development of initiatives with a positive environmental impact for the territories and society.

Disclosure of environmental management

As part of our commitment, Grupo SURA monitors the environmental management of its operations and those of its affiliated companies: Suramericana and SURA AM, based on eco-efficiency indicators, which allow controlling and improving the use of resources (water, energy and raw materials). cousins). In addition, since 2021, the Company has

made a TCFD report in order to inform our investors about the risks related to climate change and the way in which they are being managed.

Both the eco-efficiency indicators and the TCFD report are published annually by <https://www.gruposura.com/en/sustainability/>
