The results through September show that we are making good progress in executing our strategy as a financial group. In the first nine months of the year, we achieved the profit we had initially projected for all of 2026. This performance, coupled with increased profitability and a solid financial position, allows us to raise our expectations for the year and project faster progress toward the goals we communicated to the market. All of this with a clear purpose: to generate ever-greater value for our shareholders and all our stakeholders."

Ricardo Jaramillo Mejía, president of Grupo SURA.
